GUILHERME MENDES

SENIOR DATA ENGINEER | PYTHON • PYSPARK • APACHE SPARK • AWS • DATABRICKS

São Paulo, SP, Brazil | +55 11 94033-3047 | guilhermemendeds@gmail.com

LinkedIn: linkedin.com/in/guilhermemnds | GitHub: github.com/Guiilhermendes | Portfolio: guilhermendes-app-pied.vercel.app

PROFESSIONAL SUMMARY

Senior Data Engineer with experience building cloud data platforms, distributed processing solutions, ETL/ELT pipelines, and mission-critical systems for the financial sector. Skilled in Python, PySpark, Apache Spark, Databricks, AWS Glue, AWS Lambda, Amazon S3, Athena, and SQL/HiveQL, combining data engineering, automation, and software engineering practices to deliver scalable, observable, and reliable solutions. Experienced in ETL optimization, decision policy validation, data integration, and serverless workflows. Reduced ETL pipeline runtime by 30% and contributed to platforms supporting financial decision systems.

TECHNICAL SKILLS

Data Engineering: ETL/ELT, data ingestion and transformation, batch pipelines, data quality and validation, job optimization, distributed processing

Languages & Processing: Python, PySpark, Apache Spark, SQL, HiveQL, JavaScript

Cloud & Platforms: Databricks, AWS Glue, AWS Lambda, Amazon S3, Amazon Athena, AWS Secrets Manager, Microsoft Azure, Cosmos DB

Architecture & Integration: Data pipelines, serverless workflows, asynchronous processing, REST APIs, Kafka, AWS SQS

Engineering & Operations: Git, CI/CD, automated testing, technical documentation, monitoring and alerting, performance analysis

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Cosmos DB

PROFESSIONAL EXPERIENCE

Senior Data Engineer | BRQ Digital Solutions — November 2025–Present

- Develop and optimize cloud data platforms supporting mission-critical decision systems in the financial sector.
- Build and enhance data pipelines and serverless workflows using AWS Glue, Lambda, S3, Athena, and Secrets Manager.
- Contributed to a 20% increase in decision policy validation accuracy, strengthening the reliability of financial decision-making processes.
- Work with FICO DMPS on data flows and processes related to financial decision engines.
- Helped improve data platform efficiency by approximately 30% and reduce operational incidents by 25% through optimization and observability improvements.
- Enhance operational observability through dashboards and alerts, improving pipeline monitoring and failure detection.
- Collaborate on improvements to deployment workflows and the operational reliability of data processes.

Full-Stack Developer | Mobicity — April 2022–November 2025

- Developed and maintained applications and services using Node.js, REST APIs, MongoDB, and AWS services.
- Optimized Mongoose queries and implemented queues for asynchronous processing, improving data processing efficiency by 35%.
- Integrated AWS services to increase application reliability and reduce downtime.
- Contributed to application architecture improvements and practices for code review, testing, and continuous delivery.

Technology Consultant — Data & Decision Systems | Management Solutions (MS) — April 2021–April 2022

- Configured and validated decision engine policies for banking projects using Python, PySpark, HiveQL, JavaScript, Cosmos DB, and Azure Databricks.
- Optimized ETL processes, reducing pipeline runtime by 30% and helping improve SLA compliance.
- Manipulated and transformed data to support business rule validation and financial decision-making processes.
- Created technical documentation and delivered training, reducing new developer onboarding time by 20%.
- Worked with stakeholders to translate business requirements into technical deliverables.

Freelance Web Development & Marketing Data | Independent — October 2020–March 2021

- Developed websites, landing pages, and digital solutions for local businesses.
- Executed and analyzed digital campaigns that delivered returns on investment of up to 200% for clients.

Technical Support Intern / .NET Developer | Permute — April 2019–September 2020

- Developed and maintained backend systems using ASP.NET Core and integrated them with web interfaces.

EDUCATION

B.Sc. in Computer Science: Universidade São Judas Tadeu | 2018–2022

Rocketseat: Technology and Software Development Program | 2022–2023

LANGUAGES

Brazilian Portuguese: Native | English: Professional working proficiency
